**SECTION A - READING (6)**

**Read the passage and answer the questions that follow.**

The blue whale is the largest animal on earth. It is many times bigger even than the elephant. It lives in the ocean, but it is not a fish. It is a mammal. It cannot remain in the water for long. It has to come up to the surface for fresh air. It breathes with its lungs and not with gills. The whale feeds on small animals and plants which are found under water. It looks scary, but it seldom attacks human beings. Human beings hunt the whale for its oil and bones. As a result, not many whales are left in the ocean now.

**Answer the following questions.**

1. What does a whale eat? [2]

---

---

2. Why do human beings hunt the whale? [2]
