

PLACID VIDYA VIHAR SR. SEC. SCHOOL

CHETHIPUZHA

FORMATIVE ASSESSMENT 1 - 2016-17

STD: VI

Time: 1 hr.

Max. Marks: 25

ENGLISH

SECTION – A (READING) (5)

1. Read the passage and answer the following questions.

Lightning, one of nature's most powerful forces, can kill people and animals, destroy buildings and trees, and start raging forest fires. While lightning usually comes with thunderstorm, it can also occur during snow storms, sand storms and in the cloud of a volcanic eruption. Areas closest to the equator get the most lightning strikes. Going inside at the first sight of lightning is much safer. Never take shelter under a tree. Trees can get struck by lightning and the electricity would move through them to you. Even though lightning is hazardous it is essential for our planet. Every lightning bolt produces ozone gas which protects us from the sun's strong radiation. Each lightning bolt also cleans the air by making pieces of pollution fall to the ground.

- a) What are the common and possible harms caused by lightning? (1)
- b) Which areas are more prone to lightning? (1)
- c) Why is it advised not to seek shelter under a tree during lightning? (1)
- d) What are the two advantages of lightning? (2)

SECTION – B (WRITING) (5)

2. Write a letter to your principal asking permission for an annual study tour. (5)
