CHETHIPUZHA

FORMATIVE ASSESSMENT 1 - 2016-17

STD: VII Time: 1 hr.

Max. Marks: 25

ENGLISH

SECTION – A

(READING) (5 Marks)

1. Read the following passage. (5 marks)

What do you mean by literature? It means short stories, plays, novels and poems which are read and appreciated by generations of people. You will probably read and enjoy the same story as your grandfather or great-grandfather would have done, if it can be considered as literature .It has a lasting value. Have you read Alice in Wonderland or Gulliver’s Travels? Your forefathers read them too. These stories give us a peek into how human beings lived long time ago. We notice that they reacted the same way as we do: trying to become rich, falling in love, booming powerful or having fun. Only their living conditions were different because the world keeps changing with every passing generation. Literature is powerful because it gives us an idea of a writer’s beliefs, views and thoughts. Of those stories, poems and plays which talk about things that happen to all human beings and are written really well become lasting literature. The rest is read today and thrown away tomorrow.

- 1.1 Complete the sentences by choosing from the options given.

- a. Good poems and plays are
- i) Read and forgotten immediately.
 - ii) Read and appreciated by many generations.
- b. We probably read the literature
- i) Which our parents and grandparents read.
 - ii) Which is written only in the recent times.
- c. Literature includes
- i) Only prose
 - ii) Poems, stories, plays and novels.
- d. Gulliver’s Travels and Alice in Wonderland are
- i) Examples of lasting writing.
 - ii) Not appreciated today.
- e. This passage tells us
- i) What literature is all about.
 - ii) Why we should read.

Max. Marks: 25

MATHEMATICS

I. Questions 1-5 carry 1 mark each.

(5×1=5)

1. $4 + \underline{\hspace{2cm}} = (-22)$
2. $36 \div \underline{\hspace{2cm}} = (-18)$
3. Write a negative integer and a positive integer such that their sum is -8.
4. Find the product
 $(-1) \times (-5) \times (-4) \times (-6)$
5. Write in ascending order.
-4, 8, -1, 0, 3

II. Questions 6-10 carry 2 marks each.

(5×2=10)

6. Write two pairs of integers, whose difference is -9.
7. Simplify: $[(-48) \div 12] \div 4$
8. Find each of the following products
 - a) $(-14) \times (10) \times (-8)$
 - b) $(-40) \times (-3) \times (-7) \times 2$
9. Find the product using suitable property and also mention the property used
 $26 \times (-48) + (-48) \times (-36)$
10. Draw the nets for the following solids
 - a) cube
 - b) cone

III. Questions 11&12 carry 3 marks each.

(2×3=6)

11. Complete the following table.

Solids	Faces(F)	Edges (E)	Vertices (V)
Square Pyramid			
Triangular Prism			
Cuboid			

12. A cement company earns a profit of Rs. 7 per bag of white cement sold and a loss of Rs. 4 per bag of grey cement sold. The company sells 2000 bags of white cement and 4000 bags of grey cement in a month. What is its profit or loss?

IV. Question 13 carries 4 marks.

(4)

13. In a class test containing 12 questions, 4 marks are awarded for every correct answer and (-1) marks are awarded for every incorrect answer and 0 for questions not attempted.
 - (i) Radhika gets 6 correct answers and 6 incorrect answers. What is her score?
 - (ii) Gurpreet gets 2 correct answers and 10 incorrect answers. What is his score?
 - (iii) Heera gets 3 correct answers and 9 incorrect answers. What is her score?
 - (iv) Abhishek gets 7 correct answers and 5 incorrect answers. What is his score?
