**SECTION – A (READING) (5 marks)**

1. Read the passage given below: -

Decision making is a very vital part of our life. This is because what we are today is largely a result of the decisions we took in the past. Similarly whatever happens tomorrow will be a result of the decisions we take in the present. It is not possible to reverse the wrong decisions taken in the past but it is possible to train ourselves into becoming a good decision maker for the future. If we do not, we shall end up doing what we have always done and thus get what we have always got. Philosopher Walter Kaufman has called this Decidophobia.

Those who avoid taking decisions leave everything to chance and float along life with ‘what will be, will be’ attitude.

To enhance our decision making, we must first of all gather as much information as possible about the issue before we make our decision. We might be heading for a failure, if our decisions are based on half baked information.

Being clear about our goals can facilitate decision making. If we know exactly where we want to be or what we want to do in the next five years or even ten, we will decide to undertake actions which will lead us to our goals. So, outline your short term and long term goals in black and white.

- 1.1. On the basis of your reading of the above passage, complete the following statements by choosing the correct option from those given below: (1×5=5)
